Summary

AI Creative Designer and Creative Technologist focused on multimodal generative tools, AI-assisted VFX, and digital storytelling. Experienced across film marketing, short-form video, XR/VFX production, responsive web design, and ComfyUI-based workflows, with efficiency gains up to 30% and social video performance above 100,000 likes.

Skills

AI Tools: Luma, ComfyUI, Suno, Runway, Midjourney, Stable Diffusion, LibTV (Seedance2.0 and KlingO3)

Creative Production: VFX, motion graphics, color grading, trailers, promos, posters, digital human assets, XR/immersive media

Design, Web & Data: Unreal Engine, Blender, Maya, Houdini, Nuke, DaVinci Resolve, After Effects, Premiere Pro, Photoshop, HTML, CSS, JavaScript, Airtable, Google Analytics, SEO, KPI analysis, SQL

Experience

US Domestic Marketing and Distribution Intern, Highland Film Group (The Avenue)

Jan 2026 - Present

Focus: AI-assisted social content, film marketing assets, creative operations

- Developed campaign-ready trailers, promos, posters, and theatrical/digital release assets, translating creative strategy into production-ready visual deliverables with cross-functional teams.
- Managed creative asset systems in Airtable across multiple film titles, improving asset accounting, version control, and cross-team visibility for marketing workflows.
- Independently built an **AI agent** to support social media content creation, improving the marketing team's content workflow efficiency by at least 30%.

Web Design Artist (Part-time), F.O.U.N.D.

Sep 2025 - Present

Focus: Responsive web design, interactive visual systems, front-end prototyping

- Designed responsive web layouts and modular interactive components, maintaining visual consistency across scalable digital experiences.
- Implemented JavaScript-driven interaction patterns and dynamic content, enabling richer user experiences and faster creative iteration.

Technical Artist, JOYME

Mar 2025 - Jun 2025

Focus: AI-assisted VFX pipelines, generative previsualization, look development

- Designed AI-assisted VFX pipelines for facial replacement, character enhancement, and asset reuse, improving production efficiency by around 20%.
- Integrated generative AI outputs into live-action footage using ComfyUI and node-based compositing workflows for production-ready visual results.
- Led research and design teams in applying generative AI to previsualization, concept iteration, and look development.

Video Editor, NetEase

Feb 2025 - Mar 2025

Focus: Short-form cinematic editing, motion graphics, social video performance

- Produced platform-native short-form cinematic content using VFX, motion graphics, and color grading in DaVinci Resolve and After Effects.
- Delivered fast-turnaround social edits under tight deadlines; video clips earned over 100,000 likes across TikTok and WeChat Official Accounts.

Graphic Artist Intern, Studio KAY

Jun 2023 - Jan 2024

Focus: XR/immersive media, digital humans, real-time rendering

- Built digital human assets and VFX elements for XR and immersive media campaigns, supporting visually coherent immersive storytelling.
- Optimized real-time rendering workflows in Unreal Engine and Maya, reducing render time by 20% while aligning shader, lighting, and render setups with narrative intent.

Selected Project

[RealLife AI](#)

- A web-based AI photo enhancement platform built on ComfyUI and custom LoRA models, producing high-fidelity photorealistic results while preserving subject identity.

Education

M.S. in Advanced Media Management, Syracuse University (Syracuse)

B.A. in Film Studies, Zhongnan University of Economics and Law (Wuhan)

B.E. in Film & VFX, Dongseo University (Busan)
