Jingchuan (Carlton) Shi

Creative Technologist · AI Workflows & Generative Production

Syracuse, NY | Open to relocation: Los Angeles | 315-395-2313 | jshi77@syr.edu | LinkedIn | carlton0209.github.io/Carlton-Shi-s-Portfolio

PROFILE

Creative technologist who builds the AI tooling creative teams use every day. Rebuilds manual, judgment-heavy production processes as repeatable agent workflows with review and QC steps, ships the assets they produce, and trains the teams that run them. Workflow throughput gains up to 30%; social content past 100K likes.

CORE SKILLS

AI systems & agents: Agent skill design, prompt architecture, structured-output schemas, Anthropic / OpenAI / Groq / OpenRouter APIs with fallback routing, multi-model prompt portability, Claude Code
Generative media: ComfyUI (custom Python nodes), LoRA training, Flux, SDXL, ControlNet, IP-Adapter, Seedance 2.0/2.5, MiniMax H3 (Hailuo), Kling, Runway, Midjourney, Suno
Prototyping & production: Python, FastAPI, React, Next.js, Docker Compose, Linux GPU servers; After Effects, DaVinci Resolve, Premiere Pro, Nuke, Unreal Engine, Blender, Maya, Houdini
Creative ops & governance: Airtable asset systems, version control, C2PA provenance, cross-team workflow design, team training and documentation, KPI analysis

EXPERIENCE

AI Technical Artist, Flynn Agency (Pittsford, NY) Jun 2026 – Present
- Built an internal agent skill that turns a one-line creative brief into a production-ready AIGC video prompt with shot-level control over expression, dialogue timing, action and camera motion; now the team's default starting point instead of hand-written prompts.
- Standardized prompt structure across Seedance and MiniMax H3 so a brief can be re-run on a newer model without a rewrite, tying output quality to the model rather than the prompt writer.
- Designed the creative team's ComfyUI pipeline end to end (model selection, prompt templating, generation, QC, delivery) and ran it on 5 live client projects.

U.S. Domestic Marketing & Distribution, Highland Film Group (The Avenue) (Los Angeles, CA) Jan 2026 – Mar 2026
- Built an LLM-driven agent for social content creation, adopted by the marketing team as a standing part of their workflow and raising content throughput by at least 30%.
- Designed an Airtable asset system for 6 film titles, replacing ad-hoc file handoffs with versioned tracking and shared status across marketing, sales and creative.
- Produced campaign-ready trailers, promos, posters, and theatrical and digital release assets across multiple titles.

Invited Advisor, SXSW (Austin, TX) Sep 2025 – Mar 2026
- Built AI tools to screen startup eligibility, raising the number of companies processed by over 80% year over year.

Web Design Artist (part-time), F.O.U.N.D. (New York, NY) Sep 2025 – Jun 2026
- Designed responsive layouts and modular interactive components with JavaScript-driven interactions.

AI Technical Artist, JOYME (Beijing, China) Feb 2025 – Jun 2025
- Led research and design teams applying generative AI to previsualization, concept iteration and look development.
- Designed AI-assisted VFX pipelines for face replacement, character enhancement and asset reuse, cutting shot turnaround roughly 20%.

Video Editor, NetEase (Beijing, China) Feb 2025 – Mar 2025
- Produced fast-turnaround short-form cinematic content with VFX, motion graphics and color grading (DaVinci Resolve, After Effects); clips earned 100K+ likes across TikTok and WeChat Official Accounts.

Graphic Artist Intern, Studio KAY (Busan, South Korea) Jun 2023 – Jan 2024
- Built digital-human assets and VFX elements for XR campaigns; optimized Unreal Engine and Maya render setups to cut render time by 20%.

SELECTED COMFYUI WORKFLOWS (independent studies, documented at carlton0209.github.io/Carlton-Shi-s-Portfolio/works/aigc)

- **Footwear product fidelity:** MiniMax H3 shots from source footage and product photos; malformed side logos removed with reviewed motion tracks and the original artwork composited back in perspective (1080 × 1920, 24 fps).
- **Identity consistency:** face, wardrobe and light held across four camera angles and a garment swap with Qwen Image Edit 2511 and angle, consistency and Lightning LoRAs.

SELECTED PROJECTS

LINEAGE — AI content provenance and compliance platform (MVP)
- Records prompts, tools, source assets, model usage and output hashes so each AI-assisted deliverable ships with a signed C2PA-superset manifest; FastAPI ledger, Next.js dashboard, browser extension, offline Docker Compose deploy.
- Owned the non-engineering surface too: market research, five user personas, brand system, 14-slide investor deck.

RealLife AI — AI photo-enhancement platform
- Trained a custom two-stage LoRA and built the ComfyUI pipeline behind a photo-enhancement platform that keeps subject identity; React / Vite / Tailwind front end on Vercel.

EDUCATION & CREDENTIALS

M.S., Advanced Media Management — Syracuse University, S.I. Newhouse School of Public Communications 2025 – 2026
B.A., Film Studies — Zhongnan University of Economics and Law · **B.E., Film & VFX** — Dongseo University
Selected training: Advanced Learning Algorithms, DeepLearning.AI (2025) · Applied ML in Python, Univ. of Michigan (2026) · AIGC, Newhouse (2025)
