00–01s

Open on the pack. Headline arrives as a hard cut.

01–03s

Slow push into the landscape. Keep the product stable.

03–05s

Reveal the campaign line. Hold enough time to read.

05–06s

Resolve to brand and CTA. No new information at the end.

Hook → context → message → action
Keep text inside 24px side gutters. Confirm platform UI overlays before final production.

INSPECT. ADAPT. EXPLAIN.

01 / Edit an instance
Change the headline property; toggle Show CTA; switch Format and Tone. Explain why each format needs its own composition.

02 / Test the system
Make the email 375px wide. Check text reflow, feature stacking, button visibility and image crop. Keep the photograph separate from typography.

03 / Deliver clean files
Ads export at 1080px width. Email exports at 2×. Storyboard frames export at 3× (1080×1920). Use the named OH_ assets.

04 / Present honestly
Self-initiated fictional-brand project with AI-assisted photography and design support. Demonstrate your own edits and decisions; no client or performance results are claimed.
